Patent No. 6333152

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Kinzler, Kenneth
APPLICANT: Zhang, Lin
APPLICANT: Zhou, Wei
TITLE OF INVENTION: Gene Expression Profiles in No. 6333152mal and
TITLE OF INVENTION: Gener Cells
TITLE OF INVENTION: Gener Cells
FILE REFERENCE: 01107.74664
CURRENT APPLICATION NUMBER: US/09/081,646
CURRENT APPLICATION NUMBER: 60/047,352
BARLIER PILING DATE: 1999-05-21
NUMBER OF SEQ ID NOS: 871
NUMBER OF SEQ ID NOS: 871
SOFTWARE: FastSEQ for Windows Version 3.0
IENGTH: 15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    0;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     APPLICANT: Pavco, Pam
APPLICANT: McSwiggen, Jim
APPLICANT: Stinchcomb, Dan
APPLICANT: Stochedo, Jain
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
FILE REFERENCE: MBHB00, 876-J (237,198)
                                                                                                                                                            Sequence 5, Application US/09270933

Patent No. 636375

GENERAL INFORMATION:

APPLICANT: Dietmaier, Wolfgang

TITLE OF INVENTION: IMPROVED METHOD OF PRIMER-EXTENSION PREAMPLIFICATION

TITLE OF INVENTION: PCR

FILE REFERENCE: 4802

CURRENT APPLICATION NUMBER: US/09/270,933

CURRENT APPLICATION NUMBER: DE 198 13 317.0

EARLIER FILING DATE: 1998-03-26

NUMBER OF SEQ ID NOS: 17

SOFTWARE: PatentIn Ver. 2.0

SEQ ID NO 5

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 6, Application US/08713685A
Patent No. 5817795
GENERAL INFORMATION:
APPLICANT: Sergel M. GIYaznov
ITILE OF INVENTION: Oligonucleotide clamps having diagnostic
TITLE OF INVENTION: and therapeutic applications
NUMBER OF SEQUENCES: 6
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Length 16;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Indels

Sequence 23, Application US/08469461B

Sequence 23, Application US/08469461B

Factor No. 598178

GENERAL INFORMATION:

APPLICANT: Tsui, Lap-Chee

APPLICANT: Rommins, Johanna M.

APPLICANT: Kerem, Bat-Shorma M.

TITLE OF INVENTION: Introns and Exons of the Cystic Fibrosis Gene and TITLE OF INVENTION: Mutations at Various Positions of the Gene

FILE REFERENCE: 3477-61, 033477/139840

CURRENT APPLICATION NUMBER: US/08/469,461B

CURRENT FILING DATE: 1995-06-06

NUMBER OF SEQ ID NOS: 33

Sequence 27, Application US/08963946

Patent No. 5962273

GENERAL INFORMATION:
APPLICANT: Durmowicz, Gerard P.
APPLICANT: Harris, James M.
APPLICANT: Harris, James M.
TITLE OF INVENTION: Detection of Neisseria Gonorrhoeae by
TITLE OF INVENTION: Amplification and Detection of Its Nucleic Acid
NUMBER OF SEQUENCES: 39
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ·

                                                                                                                                                                                                                                                  ZIP: 07417

COMPUTER: ELDOPY disk

MEDIUM TYPE: Floppy disk

COMPUTER: IBM PC compatible

COMPUTER: IBM PC compatible

COMPRING SYSTEM: PC-DOS/MS-DOS

SOFTWARE: PatentIn Release #1.0, Version #1.30

CURRENT APPLICATION DATA:

APPLICATION NUMBER: US/08/963,946

FILING DATE:

CLASSIFICATION: 435

ATTONEY/AGENT INFORMATION:

NAME: Highet, David W.

REGISTRATION NUMBER: P-3869

REGISTRATION NUMBER: P-3869

TELEPHONE: (201) 847-5317

TELEPHONE: (201) 847-5317

TELEPHONE: (201) 848-9228

INFORMATION FOR SEQ ID NO: 27:

SEQUENCE CHARACTERISTICS:

LENGTH: 15 base pairs

LYPE: nucleic acid

STRANDEDNESS: single

; Sequence 10, Application US/08994946A
; Patent No. 6046317
; GENERAL INFORMATION:
APPLICANT: Koulu, Marku
APPLICANT: Rarvonen, Matti
APPLICANT: Pesonen, Ullamari
APPLICANT: Useitupa, Matti
TITLE OF INVENTION: Prepro-Neuropeptide Y, a Mutant Signal Peptide, and Uses
TITLE OF INVENTION: Thereof
NUMBER OF SEQUENCES: 14
CORRESPONDENCE ADDRESS:
ADDRESSE: Rothwell, Figg, Ernst & Kurz, P.C.
STREET: 555 13th Street NW, Suite 701-E
CONTY: Washington
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ..
